EXPERIENCE

Co-founder & Head of Technology, Parc Studio, Paris — 2025 – present

- Co-founded an independent studio of four delivering strategy, design, development and growth for brands in fashion, beauty and culture.
- Clients include **Chanel**, **Loop Earplugs**, **Nothing Tech** and **System Magazine**.
- Lead technical direction across the studio: front-end architecture, performance, CMS and commerce integration, infrastructure and maintenance.
- Build interfaces that hold up on detail and motion, with accessibility designed in from the mockups rather than retrofitted before launch.
- Direct the studio's applied research practice: public prototypes that push at the edge of the browser — live shopping, virtual try-on and network-adaptive storefronts.
- Co-organise **Not Today**, a cultural event programme run alongside the studio's client work.

Freelance Web Developer, Paris & remote — 2023–2025

- Eight client projects in commerce and editorial: Shopify storefronts, Sanity CMS builds and motion-led portfolio sites for studios, artists and designers in Paris, New York and Amsterdam.

Insurance Claims Adjuster, Elex, Paris — 2018–2023
